II. OBJECTIVES

The objectives of making arrangements are as under: -

- a) Maintenance of law and order at all the times i.e. before, during and after the polls, in order to ensure free and fair elections. In this regard, observance of the Model Code of Conduct assumes special importance by all concerned.
- b) Maintenance of order at the Polling Stations/Booths so that the voters are able to exercise their Right of Franchise without any hindrance.

III. ASSESSMENT

- a) The Returning Officers and the Asst. Returning Officers are primarily responsible for ensuring smooth conduct of the polling process. However, maintenance of law and order prior to, during and after the polling, as also during the counting process is the responsibility of the Police. It would be, therefore necessary **to remain utmost alert and collect intelligence about the happenings** in the respective jurisdiction of Police Stations, for swift and effective action in case of need and intervention by taking prompt legal action.
- b) Depending upon the past history and latest information available about the electioneering in constituencies, **Critical Polling Booths and vulnerable areas/hamlets** have been identified for focused attention by Police Officers. - c) VVIPs are likely to visit the State of Goa in order to address public meetings in some of the constituencies. Threat to the visiting VVIPs from various terrorists, extremists and subversive groups cannot be ruled out. Therefore, while planning uniformed Police and plain-clothes arrangements, special attention has to be paid to ensure that nothing untoward occurs. The public meetings and other functions to be addressed by Hon'ble P.M. of India, Presidents various National Political Parties, Leader of Opposition, in particular would require special attention. Meticulous planning, briefing of staff and sensitizing them about threat perception are extremely essential. It would have to be ensured that fullproof security arrangements are made during such public functions.
- d) There may be rivalry between the candidates either belonging to the same party or having broken off for some reasons, which is likely to cause frictions during the propaganda process or even after declaration of the election results. It would therefore be necessary for the police to be extremely vigilant round the clock to know the problems. At the first sight of any trouble, the In-charge of Police Station should rush and act according to law. In case, small problems are not controlled in time, it may escalate into serious law and order problem. The Police should not only act impartially, but they should appear to be so in the eyes of the public and ensure that free and fair elections are held in peaceful manner.

- a. Static guarding of chosen Polling Stations solely and exclusively by CAPF.
- b. Static guarding of Polling Stations as part of a mixed (composite) team with local State forces.
- c. Patrolling duty on assigned routes (election sectors) covering a fixed cluster of Polling Stations.
- d. Patrolling duty as 'flying squads' in a defined area with surprise elements;
- e. Escorting duty of Polled EVM with Polling personnel back to the receipt centre/strong room after polls are over;

- f. Any other duty which is necessitated to ensure the purity and fidelity of the election process.

For the duty of Static guarding of polling stations, the CAPF shall take positions in the assigned Polling Stations on the poll-eve (day prior to the poll). The CAPF shall be primarily responsible for protecting the polling stations and regulating the entry inside the Polling Stations. In such cases, one Jawan of the CAPF shall position himself at the door of the Polling Station (either in static or oscillating mode) in order to observe the proceedings that are going on inside the Polling Station, as per the directions of Hon'ble Supreme Court. Static guard duty in an oscillating mode is a situation when a building has multiple polling stations and CAPF deployed is not sufficient to cover every polling station (door). In such situation, the CAPF Jawan on duty at the entrance of the polling station may be asked to oscillate from one polling station door to the other and keep an eye on what is going on inside these polling stations and report to the officer in-charge of the CAPF or the Observer, if anything unusual is observed by him.

In all cases where CAPF has been assigned static guard duties but could not reach the assigned polling station due to any reason, the poll shall not commence.

In all such **solely and exclusively CAPF** assigned Polling Stations, in any case, Local State Police shall not replace the CAPF at polling stations and no senior officer of the local state police, with or without contingent shall position himself at such polling station and exercise any supervision and control over the CAPF at the polling stations.

In some cases CAPF and the local State police can be mixed to form composite teams in the ratio of 1:1 to maximize the static coverage of the polling stations by CAPF. In such cases, the CAPF Jawans will take position at the door of the polling station and CAPF will continue to report to its Coy Commandant without any interference from the State Police contingent.

Wherever CAPF is on static guard duty (whether exclusively or compositely with local police), it is advised that two unarmed local state police personnel/Home Guards (and in any case, a minimum of one) be posted at each polling station premises so that in case of any requirement, reinforcement of local police can be called.

When CAPF is assigned duties of mobile patrolling on assigned routes (election sectors) having a cluster of polling stations, the CAPF contingent shall ensure the supervision and guarding of polling stations falling on that sector (route). They will be moving from one polling station to another polling station, ensure the fidelity of the election process in the polling stations and assist (or join) the sector officers to accomplish it in a more effective manner. In such mobile mode, the CAPF mobile shall be provided a list of critical polling stations (and the uncovered polling stations) falling on that route. The CAPF mobile, while patrolling should maintain constant and close supervision on such polling stations. For the purpose, it should also be in constant touch with election sector officer on that route as well as the micro-observers or even the Presiding Officers of the Polling Stations.

For such mobile patrolling duty, the CAPF shall be provided sector route maps (sketch) of each sector/route which is under their charge. The sketch should indicate the polling stations locations, their sensitivity gradation, the sector officer's name and contact number, RO's and Observer's name and contact numbers etc.

When CAPF is assigned duty in a 'Flying squad' mode, the CAPF contingent will only be indicated an area. The squad will be fully and constantly mobile and undertake random surprise checks on polling stations falling within the area and report to the district control room

on their findings. They shall not be attached to any polling stations or section or sector in particular. The flying squad shall be accompanied by a 'Zonal Magistrate'.

A minimum guaranteed arrangement of two unarmed local State Police personnel/Home Guards shall be made for each of the polling stations. However, when a polling station is covered with static CAPF unit, only one local police would do, if there is shortage of force.

After the Poll is completed, the polled EVMs and the polling personnel shall be escorted by CAPF contingent to the receipt centre.

CAPF may also be assigned the duty of guarding the Strong Room where the polled EVMs shall be stored and kept till the day of counting.

The local state armed police can also get deployed exclusively at polling stations, when enough, CAPF is not available. This shall however be done under the specific instructions of the Election Commission through its Observers. In such cases the local police shall not stand at the entrance door of the polling station and instead would be positioned away from the line of sight of the polling personnel inside the polling station. He shall stand at such distance from the door that there is no scope of any apprehension about his interference in the poll proceedings going on inside the polling station.

The constituency-wise force deployment plan for election duty (including that of the CAPF, the state police as well as the sector plan through sector officers – SO) shall be vetted and finalized by the Observer of the constituency concerned. For the purpose, the Observer shall be handed over a draft of the election plan including the force deployment plan immediately on arrival in the state. The Observer shall take review meetings with the DEO/SP/RO and SO on the draft proposals and based on his assessment of the ground realities make necessary changes before finally approving the plan. The plan as approved by the Observer shall be implemented by the DEO and SP on the ground, without any deviation. Any subsequent changes that may be necessitated for any reason should be brought to the notice of the Observer and his/her approval obtained before effecting such change.

The local State Police shall remain responsible for maintenance of the general law and order in the catchment area of the polling stations, as well as the inside and outside of the polling premises (as different from polling stations). The Commission has instructed that hamlets/habitations within a polling station area that are vulnerable to threat, intimidation and undue influence shall be identified and all necessary confidence building and preventive measures shall be taken in advance.
