Dear Sir/Madam,

It is my great pleasure to recommend Freeman Bwalya Kabwe for admission for Doctoral School Program. I got to know Freeman as his lecturer at Zhejiang University of Technology when his was pursuing his Master's Degree in Chemical Engineering and Technology. During that time, I was thoroughly impressed by Freeman's commitment in my course; Modern Analysis Techniques in Material Science.

While doing research in Chemical Engineering and Technology at Zhejiang University of Technology, Freeman demonstrated extraordinary his intellectual strengths. His academic performance in Chemical Engineering research was already on a level that would usually only be expected from a PhD student. In it he showcased his ability to independently write and revise the manuscript until publication.

In addition to Freeman's exceptional accomplishments in my course, his perseverance made him an outstanding student. Besides his academic performance, Freeman engaged in extra curriculum activities like painting, Kungfu, dancing and voluntary activities in order to experience and feel the Chinese culture. His spoken Chinese language is excellent and this made communication easier for him with his lab mates and school mates.

It is my strong opinion that Freeman would be a tremendous addition for your doctoral program, and he has my highest recommendation. Please feel free to contact me if you have any questions regarding his character or past academic work.

Yours Sincerely,

A handwritten signature in black ink that reads 'zheng yifan' in a cursive style.

Yi-Fan ZHENG, Ph. D., Professor
